

&CENTOR S2™  
SIDEWAYS PULLING BLIND SYSTEM

# &CENTOR S2™

## SIDEWAYS PULLING BLIND SYSTEM

With the ability to cover an incredible 12.8m<sup>2</sup> in a single system, the Centor S2 screens are outstanding performers for your shading requirements

### OVERVIEW

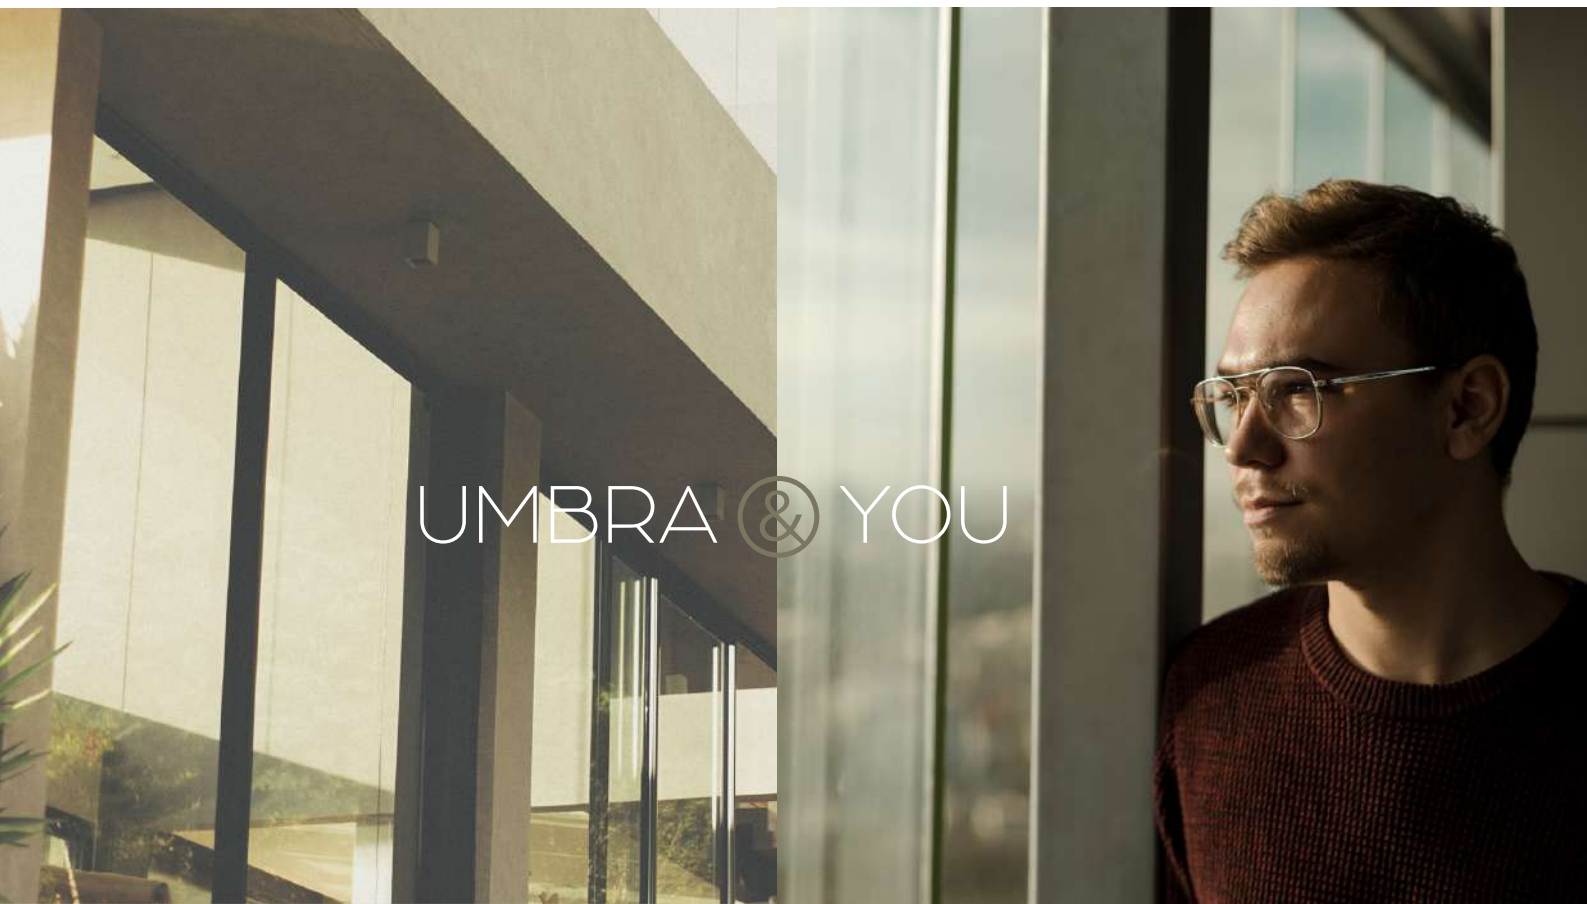

- Fingertip operation
- 5 year warranty
- Includes headbox, side boxes and cill runner
- Sizes up to 4m wide, 3.2m drop, 12.8m<sup>2</sup>

### SYSTEM DETAILS

The S2 Screen allows homeowners with smaller openings to enjoy the luxury of inside-outside living, insect protection, fresh air, breezes and uninterrupted views. Designed to fit nearly any door — folding, french or sliding — S2 delivers unparalleled engineering.

Operating with just a fingertip, Centor's unique load balancing technology allows screens to glide smoothly across the entire opening and effortlessly stop at any desired position.

When not in use, the screen retracts discreetly into the frame, removing visual distractions to the view outside while also protecting it from damage, dust or dirt.

UMBRA & YOU

#### Finger-tip operation

Engineered to glide from any height

#### Unobtrusive

Screens are there when needed & hidden when not

#### Made to order

Custom-made to your specific requirements

#### Reduce cooling needs

Screens allow breezes

## Technical benefits

- Pair with smaller doors or windows, new or existing.
- Operates from any height with one hand so the youngest of family members can operate the screen.
- The screen is fully retained within the frame on all sides to allow total control of insects.
- S2 can be mounted on the inside or outside – drainage holes are added to the sill for externally mounted systems.
- Compact design – low-profile sill, just 19mm or 25mm high.
- Covers are quick and easy to remove to make servicing trouble free.

## SCREEN CONFIGURATIONS

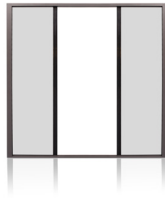

### Single

A single screen that extends from one side of the frame and covers the full width of the opening, up to 2070mm wide<sup>1</sup>.

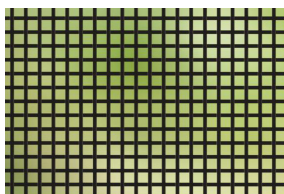

### Double

Two screens meeting in the middle of the opening up to 4000mm wide<sup>1</sup>.

## INSECT SCREENS

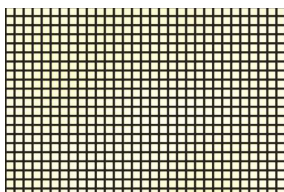

Insect mesh is available in two different weave styles to suit varying environmental requirements.

### Standard weave

Keeps insects like moths, flies & mosquitoes outside.

Openness: 46%

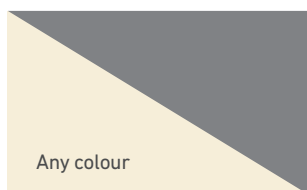

### Tight weave

Protect interiors against tiny insects like midges.

Openness: 37%

## FRAME COLOURS

S2 is constructed from durable aluminium. The frame can be powder-coated in one of our popular colours ([centor.com/screens](http://centor.com/screens)) or customised to colour match existing doors and windows<sup>3</sup>.

Perfect for retro-fit or new build, S2's options of 19mm or 25mm sill height allows easy alignment

Spanning up to 4m wide, S2 can be paired with most popular XO sliding and French doors

S2's slim frame delivers clean, unobtrusive lines and uninterrupted views

With the same cable system as S4, existing installers can fit both screen systems with ease.

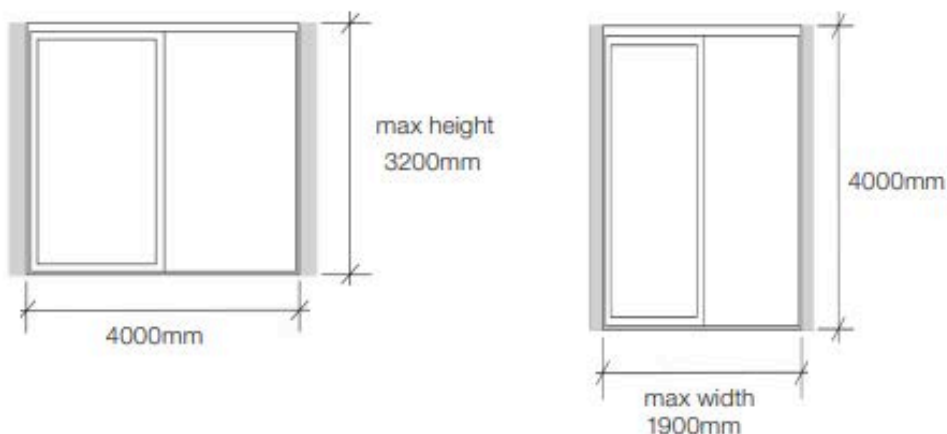

## SIZE CONFIGURATIONS

With its slimline frame, S2 is specially designed for smaller openings. Pair with XO sliding, French or folding doors up to the following sizes:

max frame width

| sill type | frame height | double | single<br>70mm jamb | single<br>25mm jamb |
|-----------|--------------|--------|---------------------|---------------------|
| 19mm sill | up to 3200mm | 2550mm | 1345mm              | 1300mm              |
| 25mm sill | up to 3200mm | 4000mm | 2070mm              | 2025mm              |
|           | up to 3700mm | 2550mm | 1345mm              | 1300mm              |
|           | up to 4000mm | 1900mm | 1020mm              | 975mm               |

S2's maximum dimensions are affected by total fabric weight and screen tension. To ensure the product operates well, when the screen is wider the maximum height is reduced, and when the screen is taller the maximum width is reduced.

## Complementing systems

**S4 Corner Screen**

Insect screens &/or shades for post-less doors or windows

**S4 Screen & Shade**

Insect screens &/or shades for large doors or windows up to 9.013m wide
